Linch-pin personnel have a wealth of experience in the Transportation and Installation (T&I) of offshore platforms, key milestones in offshore mega-projects. Linch-pin personnel have been involved in a number of major offshore T&I operations including the Bayu-Undan, Pluto, EPOD-STD, North Rankin B and Montara developments.

The Linch-pin structural and installation engineering team has the experience and expertise to assist clients throughout the T&I process, from concept through to execution.

Our team's experience includes:

- Transportation analysis
- Lift analysis
- Grillage and seafastening design
- Barge capacity checks
- Design of spreader beams and frames
- Design of installation aids
- Rigging design
