Linch-pin was invited by PTTEP AA to assist them with managing the Montara Recovery Project WHP Hook-up and Refurbishment Campaign. This involved a newly fabricated Topsides to be hooked up to the wells and to the risers, as well as an extensive campaign on the Jacket itself to replace badly corroded handrails, stairways and grating, removal of installation aids and complete recoat of the Jacket from the splash zone to the underside of Topsides.

The work was executed utilising large construction support vessels of opportunity, namely the Normand Sapura and then the Southern Ocean.

Linch-pin undertook the engineering, procurement (on PTTEP AA paper) and the fabrication and offshore hook-up and refurbishment management.

Linch-pin's scope included:

- Development of budget, schedule, execution plan.
- Development of detailed procedures and work packs.
- Engineering of temporary works.
- Development of procurement plan and contracting strategies.
- Tendering for large contract value services.
- Fabrication management.
- Vessel loadout management.
- Subcontractor management.
