

PROJECT:

Subsea Umbilical Skids
Procurement, Fabrication & Supply

under-promise
over-deliver

CLIENT:
PTTEP/Jadestone Energy
LOCATION:
Timor Sea
DATE:
Q1-Q2 2019

Upon completion and approval of the Montara electrical umbilical replacement project subsea structures design and engineering scope of work, as performed by Linch-pin Perth, PTTEP awarded the procurement, fabrication and fast-track delivery of the subsea structures to Linch-pin in a lump sum contract.

Linch-pin managed the engineering support and project management process from its Perth office, while its Singapore office oversaw the procurement, fabrication, and delivery process ensuring that technical, HSE and Quality requirements were met by the fabrication subcontractor, and that the fast-track schedule was maintained, to meet PTTEP's offshore execute schedule.

The supply was conducted in accordance with AISC and AWS standards.

The subsea structures were all completed on time and within budget.
